We Deliver IT Solutions

## Premium Technology Portfolio

# Security, IT Infrastructure, Networking, Power Backup, Automation & AV Solutions

A practical technology partner for homes, offices, institutions, hospitality, retail and industrial environments across Kerala. Blue Orbit Technologies helps customers plan, install, secure and maintain systems that keep operations visible, connected and resilient.

<b>Established 2009</b>	<b>Palakkad, Kerala</b>	<b>End-to-end Support</b>
15+ years of field experience	Local consultation, installation and service	Survey, supply, installation, configuration and maintenance

Company Snapshot

# Technology systems planned around real sites, real risks and real business uptime.

Blue Orbit Technologies provides integrated solutions across security, IT infrastructure, networking, power backup, solar, automation, communication and AV. Instead of treating each device as a separate purchase, we help customers build dependable systems that work together and remain supportable after installation.

### What We Deliver

Consultation, product selection, supply, installation, configuration, maintenance and upgrade support.

### Why Customers Choose Us

A single accountable technology partner for CCTV, access, servers, networking, backup power, communication and IT products.

Selected Clients

# Trusted by respected businesses, institutions and organizations.

Blue Orbit Technologies has supported clients across dairy, sports, hospitality, retail, finance, industry, healthcare, education and commercial sectors.

			
			
			

## Client Portfolio Includes

Milma, Kerala Cricket Association, Lulu Forex, Powergrid, Tripenta Hotel, Kalyan Motors, Kairali Ayurvedic Healing Village, KELL, FCRI, Honey Brown, Govardhana Samos, Toni & Guy, Daya, Hasco Tower, Burger Tree, Dressworld

Project Approach

# A clean process from first discussion to long-term support.

## 1. Requirement Study

We understand the site, users, risks, budget and required uptime before recommending products.

## 2. Site Planning

Camera positions, network points, power backup, cabling, access rules and storage needs are mapped clearly.

## 3. Installation & Configuration

Devices are installed, configured and tested for real-world use, not just powered on.

## 4. Handover & Support

Customers receive practical guidance, maintenance options and future upgrade paths.

## Typical Requirements We Handle

- New office setup with CCTV, LAN, Wi-Fi, attendance and UPS backup
- Retail billing counter with barcode printer, scanner, printer and support
- School or institution with CCTV, PA system, projectors and access control
- Business continuity setup with servers, NAS, data backup, firewall and endpoint security
- Home or commercial automation with automatic gates and reliable network coverage

# Let us plan the right technology system for your site.

Share your requirement, photos, location details or current issue. Blue Orbit Technologies will help you choose a practical, reliable and supportable solution.
